

## 防腐热电阻 Anti-corrosion thermal resistance

### 应用

采用新型防腐材料，外包覆聚四氟乙烯F46，适用于石油化工各种腐蚀性介质中测温。是氯碱行业的专用测温仪表。

### Application

It adopts the new anti-corrosion materials with PTFE F46 being rapped externally and it is suitable for temperature measurement in all kinds of corrosive medium in petrochemical industry. It is a special temperature-measuring instrument in chlor alkali industry.

### 主要技术参数

电气出口:M20×1.5,NPT11/2  
热响应时间:≤8s  
防护等级:IP65  
防爆等级:dIIBT4.dIICT5

### Main technical parameters

Electrical outlet:M20×1.5,NPT11/2  
Thermal response time:≤8s  
Protection level:IP65  
Explosion-proof grade:dIIBT4.dIICT5
